

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Prevotella</i>	62.8%
Genus <i>Bacteroides</i>	10.4%
Genus <i>Paraprevotella</i>	5.9%
Family Lachnospiraceae	3.2%

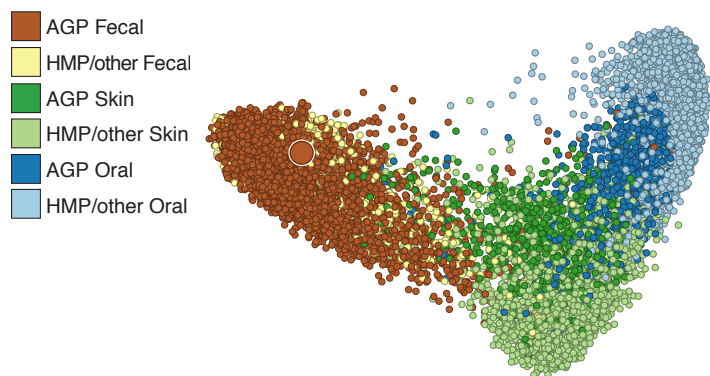

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Prevotella</i>	62.83%	4.26%	15x
Family Victivallaceae	0.09%	0.02%	6x
cont. Genus <i>Prevotella</i>	1.92%	0.17%	11x
Genus <i>Paraprevotella</i>	5.86%	0.53%	11x

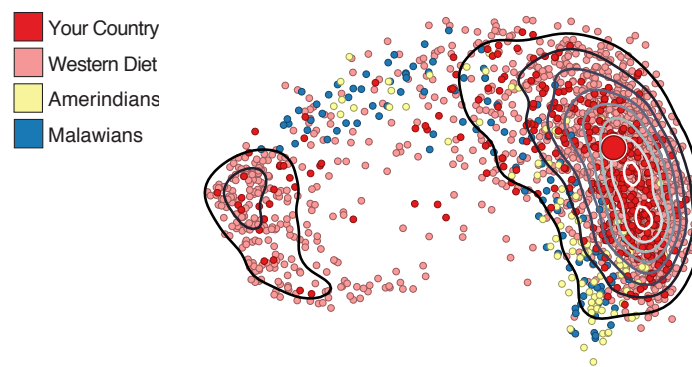

Your sample contained 6 rare taxa, including the following: Genus *Brevibacterium*, Genus *Dermabacter*, Genus *Pseudo-clavibacter*, Genus *Facklamia*, Genus *Clostridium*.

How do your gut microbes compare to others?
