

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Sphingobium</i>	23.6%
Genus <i>Bacteroides</i>	13.3%
Genus <i>Parabacteroides</i>	9.3%
Family Xanthomonadaceae	8.1%

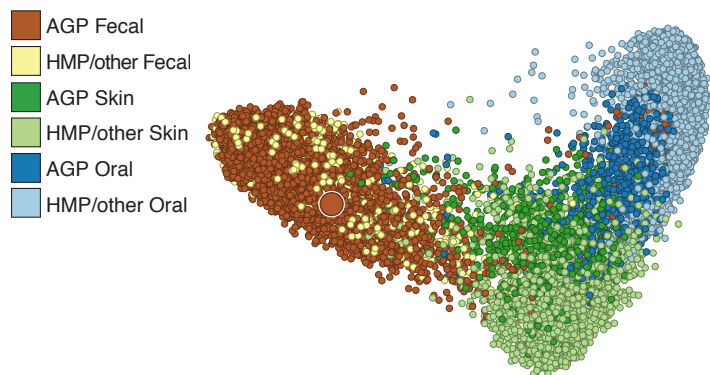

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Mycoplana</i>	0.85%	0.02%	44x
Order Sphingomonadales	0.07%	0.00%	119x
Genus <i>Citrobacter</i>	0.01%	0.00%	6x
Genus <i>Phenyllobacterium</i>	0.96%	0.00%	409x

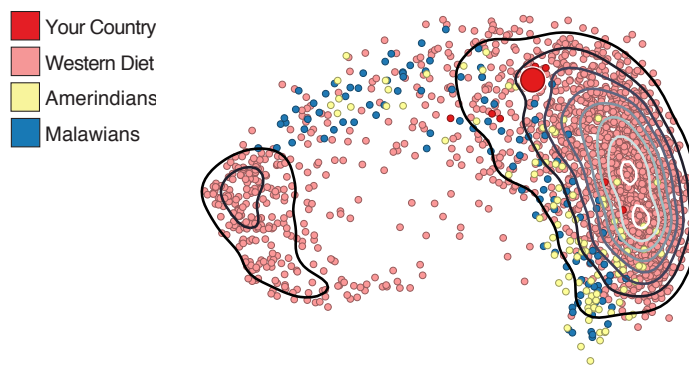

Your sample contained 26 rare taxa, including the following: Genus *Mycobacterium*, Genus *Pimelobacter*, Genus *Sphingobacterium*, Genus *Cohnella*, Genus *Solibacillus*.

How do your gut microbes compare to others?
