

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Family Ruminococcaceae	20.2%
Genus <i>Bacteroides</i>	18.1%
Genus <i>Dorea</i>	8.4%
cont. Genus <i>Ruminococcus</i>	6.8%

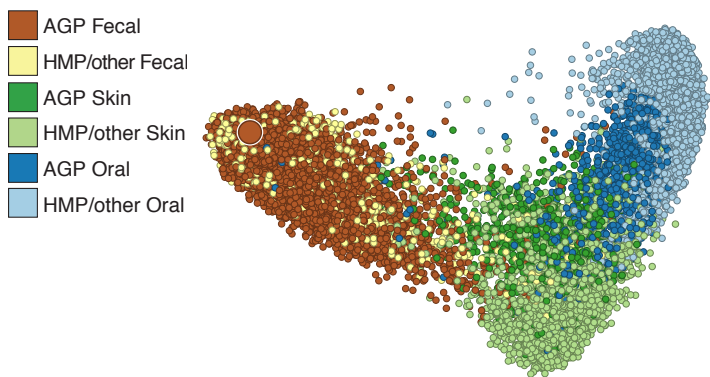

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Synergistes</i>	0.04%	0.00%	21x
cont. Family Barnessiellaceae	1.28%	0.69%	2x
Genus <i>Butyrivimonas</i>	0.37%	0.14%	3x
Genus <i>Odoribacter</i>	0.33%	0.12%	3x

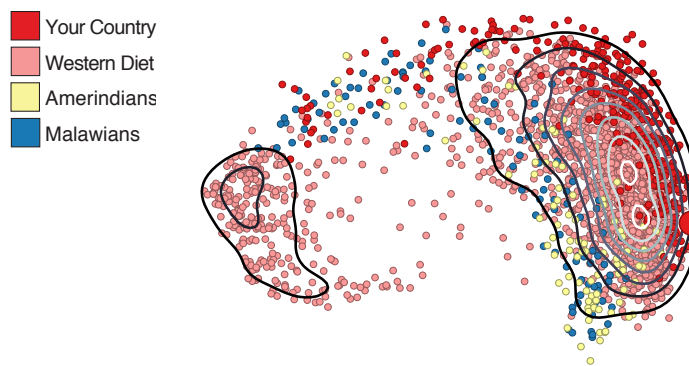

Your sample contained the following rare taxa: Genus *Methanomassiliococcus*, Genus *Pseudoramibacter-Eubacterium*, Genus *Cloacibacillus*, Genus *Synergistes*.

How do your gut microbes compare to others?
