

## UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Family Lachnospiraceae	30.0%
Genus <i>Bacteroides</i>	25.5%
cont. Genus <i>Ruminococcus</i>	10.7%
Genus <i>Blautia</i>	8.8%

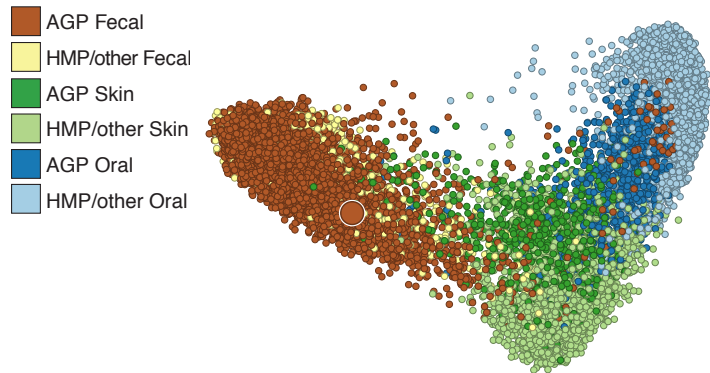

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Megasphaera</i>	0.73%	0.11%	7x
Genus <i>Oscillospira</i>	5.04%	1.08%	5x
Family Lachnospiraceae	30.01%	7.18%	4x
cont. Genus <i>Ruminococcus</i>	10.75%	0.73%	15x

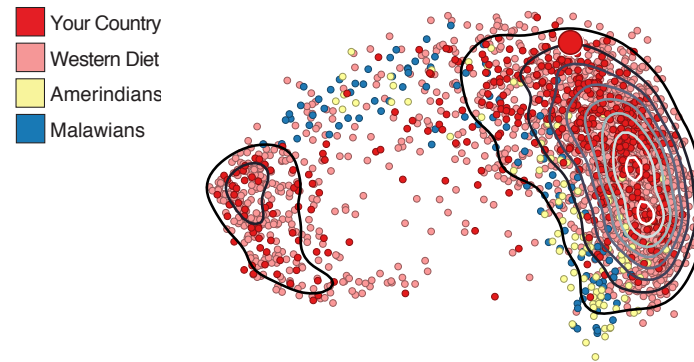

Your sample contained the following rare taxa: Genus *Geobacillus*, Genus *Aerococcus*, Genus *Brevundimonas*, Genus *Delftia*.

How do your gut microbes compare to others?
