

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Faecalibacterium</i>	16.2%
Genus <i>Prevotella</i>	10.6%
Genus <i>Clostridium</i>	9.5%
Family Lachnospiraceae	9.1%

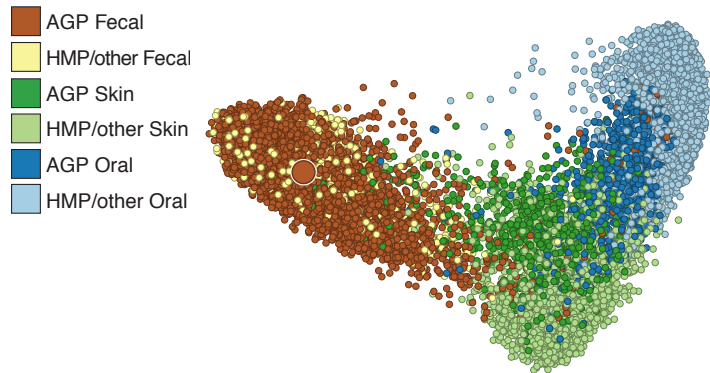

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Eggerthella</i>	0.14%	0.02%	7x
Genus <i>Serratia</i>	2.85%	0.37%	8x
Genus <i>Odoribacter</i>	0.47%	0.12%	4x
Genus <i>Blautia</i>	4.28%	2.65%	2x

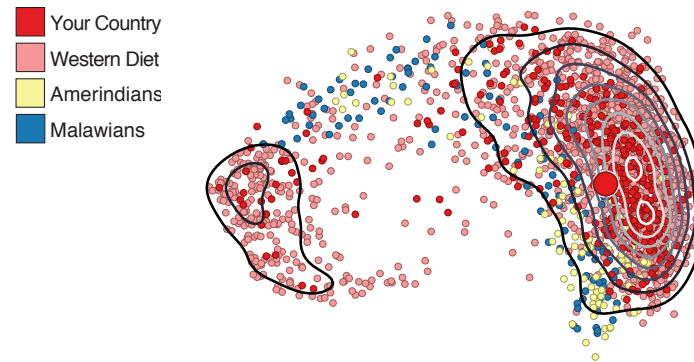

Your sample contained 7 rare taxa, including the following: Genus *Dermabacter*, Genus *Micrococcus*, Genus *Oceanobacillus*, Genus *Kurthia*, Genus *Butyricoccus*.

How do your gut microbes compare to others?
