

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Clostridium</i>	20.6%
Order Clostridiales	18.0%
Family Ruminococcaceae	15.6%
Genus <i>Prevotella</i>	12.3%

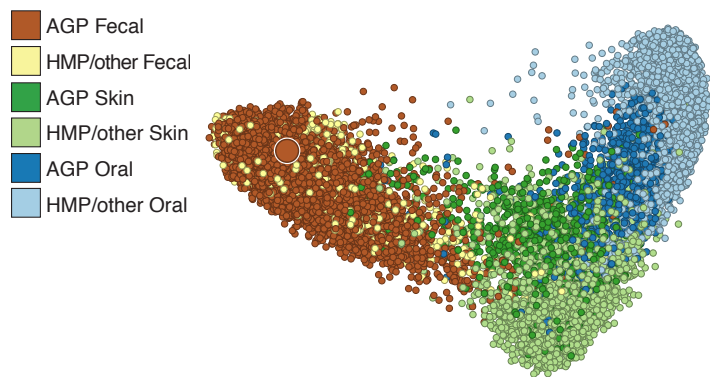

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Family Coriobacteriaceae	0.29%	0.10%	3x
Genus <i>Prevotella</i>	12.35%	4.26%	3x
Genus <i>Sarcina</i>	0.28%	0.03%	10x
Genus <i>Clostridium</i>	20.59%	0.66%	31x

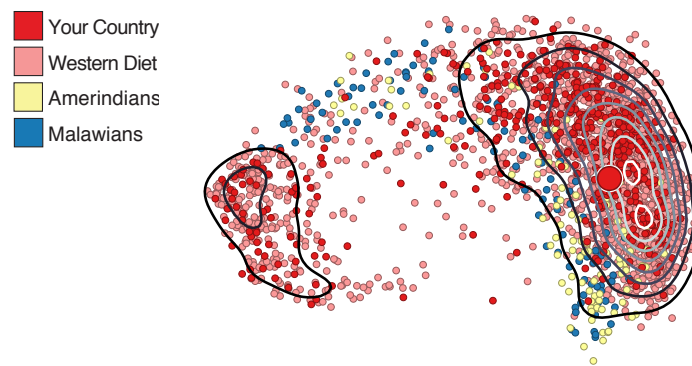

Your sample contained 6 rare taxa, including the following: Genus *Brevibacterium*, Genus *Dermabacter*, Genus *Facklamia*, Genus *Moryella*, Unclassified Family Rhizobiaceae.

How do your gut microbes compare to others?
