

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Brevundimonas</i>	44.8%
Genus <i>Rhodospirillum</i>	18.5%
Genus <i>Flavobacterium</i>	8.4%
Family Aeromonadaceae	7.8%

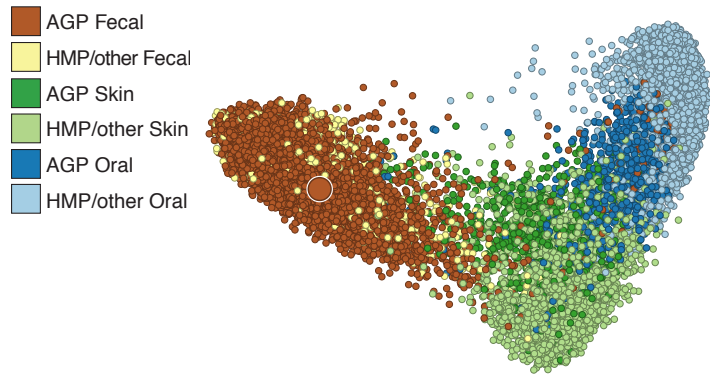

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Aquamonas</i>	0.16%	0.03%	6x
Genus <i>Aquamicrobium</i>	0.01%	0.00%	1008x
Genus <i>Pseudoxanthomonas</i>	0.02%	0.00%	22x
Family Phyllobacteriaceae	0.10%	0.00%	100x

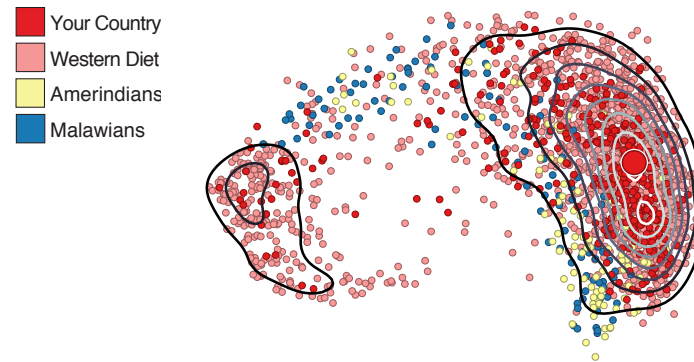

Your sample contained 32 rare taxa, including the following: Genus *Leucobacter*, Genus *Rhodococcus*, Unclassified Family Flavobacteriaceae, Genus *Flavobacterium*, Genus *Olivibacter*.

How do your gut microbes compare to others?
