

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Prevotella</i>	54.2%
Genus <i>Akkermansia</i>	11.1%
Genus <i>Bacteroides</i>	6.1%
Family Lachnospiraceae	3.2%

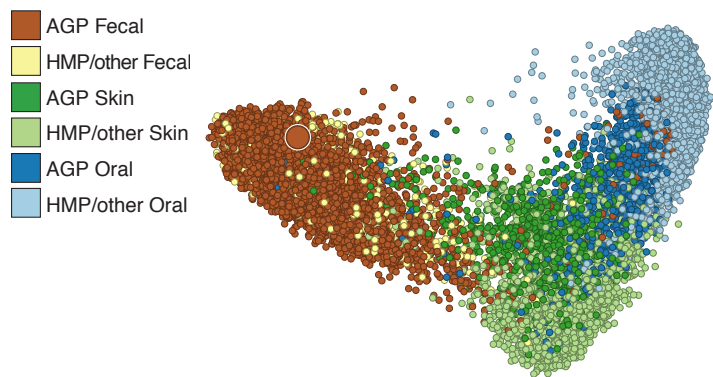

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Lachnobacterium</i>	0.62%	0.20%	3x
Genus <i>Phascolarctobacterium</i>	1.67%	0.64%	3x
Genus <i>Schwartzia</i>	0.01%	0.00%	125x
Genus <i>Conchiformibius</i>	0.01%	0.00%	40x

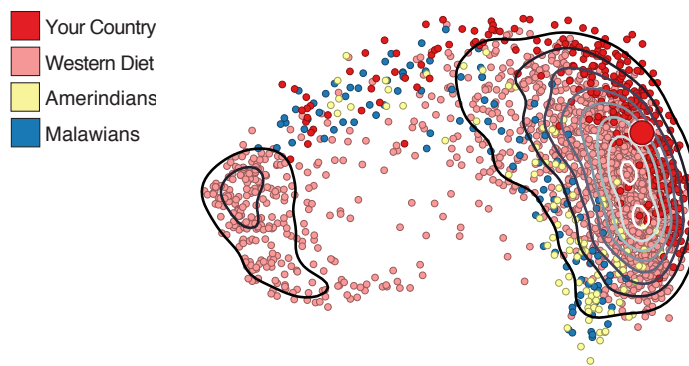

Your sample contained 8 rare taxa, including the following: Genus *Gardnerella*, Genus *Geobacillus*, Genus *Schwartzia*, Genus *Clostridium*, Genus *Rhodospirillum*.

How do your gut microbes compare to others?
