

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Family Ruminococcaceae	17.5%
Genus <i>Bacteroides</i>	17.1%
Order Clostridiales	14.3%
Genus <i>Faecalibacterium</i>	7.5%

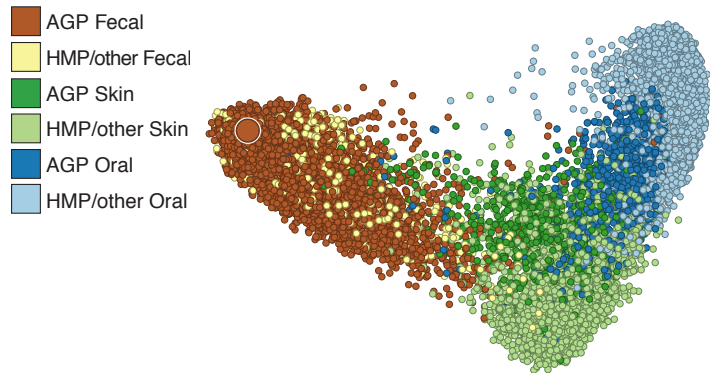

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Coprococcus</i>	4.72%	2.25%	2x
Genus <i>Victivallis</i>	0.01%	0.00%	4x
Family Ruminococcaceae	17.48%	8.94%	2x
Family Erysipelotrichaceae	1.40%	0.68%	2x

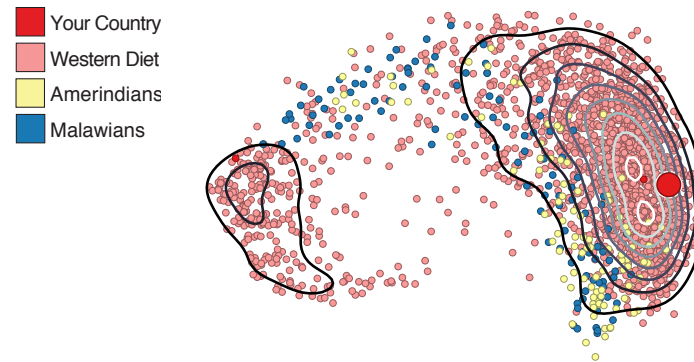

Your sample contained 12 rare taxa, including the following: Genus *Brevibacterium*, Genus *Dietzia*, Genus *Micrococcus*, Genus *Gardnerella*, Genus *Jeotgalicoccus*.

How do your gut microbes compare to others?
