

## UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Faecalibacterium</i>	23.3%
Genus <i>Bacteroides</i>	18.3%
Family Ruminococcaceae	15.1%
Genus <i>Prevotella</i>	9.7%

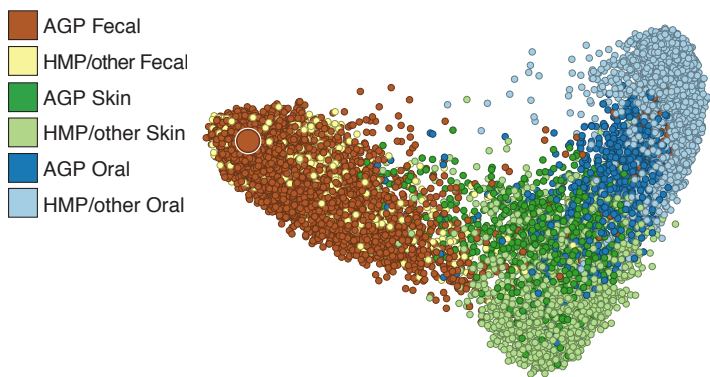

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Prevotella</i>	9.72%	4.26%	2x
Genus <i>Ruminococcus</i>	0.01%	0.00%	22x
Genus <i>Alistipes</i>	0.39%	0.05%	7x
Genus <i>Lachnobacterium</i>	0.62%	0.20%	3x

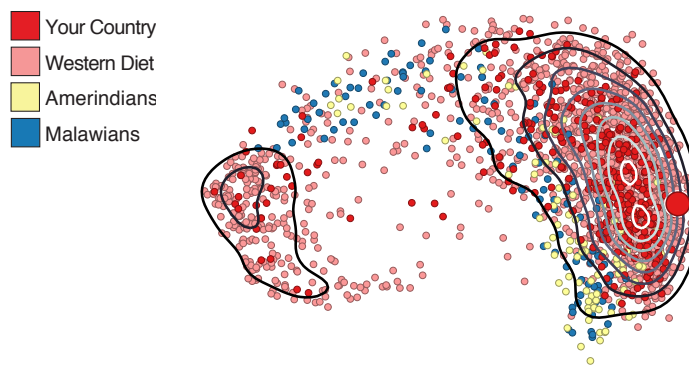

Your sample contained 8 rare taxa, including the following: Genus *Gardnerella*, Genus *Salinicoccus*, Unclassified Family EtOH8, Genus *Ruminococcus*, Genus *Clostridium*.

How do your gut microbes compare to others?
