

UNIDENTIFIED

What's in your American Gut sample?

Your most abundant microbes:

Taxonomy	Sample
Genus <i>Brevundimonas</i>	46.0%
Genus <i>Comamonas</i>	27.0%
Genus <i>Delftia</i>	7.9%
Family Lachnospiraceae	3.7%

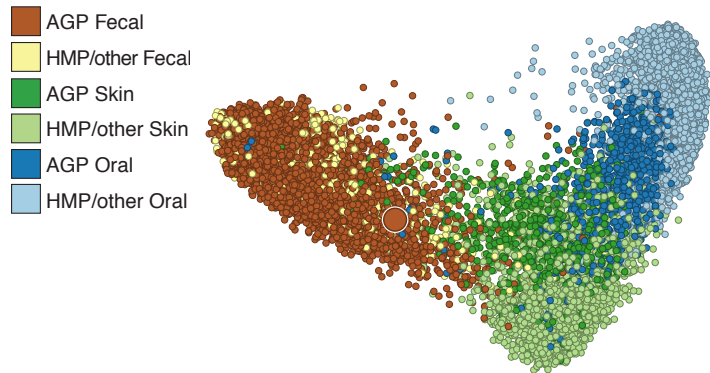

Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Delftia</i>	7.87%	0.07%	118x
Genus <i>Comamonas</i>	26.98%	0.43%	63x
Genus <i>Limnohabitans</i>	0.02%	0.00%	10x
Genus <i>Mitsuaria</i>	0.00%	0.00%	60x

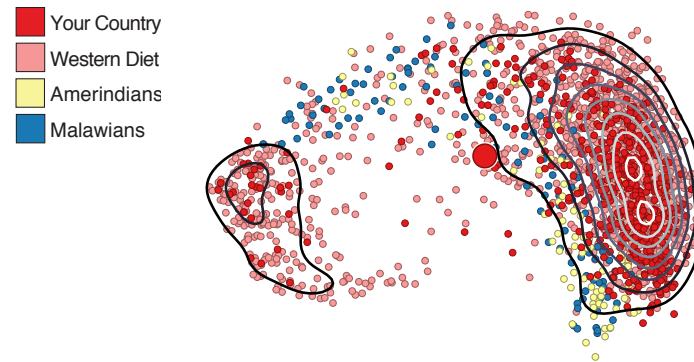

Your sample contained 24 rare taxa, including the following: Genus *Agromyces*, Genus *Leucobacter*, Genus *Rhodococcus*, Genus *Cellulosimicrobium*, Genus *Facklamia*.

How do your gut microbes compare to others?
